EXPERIENCE

Intern

Jan 2026 – Sept 2026(On-Site)

Primal Infosys Pvt. Ltd (On-Site)

- Designed and developed responsive business websites using HTML, CSS, Bootstrap, and JavaScript.
- Transitioned static websites into dynamic React.js apps, improving interactivity and maintainability.
- Contributed to multiple domains like e-commerce and cab booking with reusable UI components.

Quality engineer

Jun 2024 – Aug 2024(On-Site)

Jabil India Private Limited

- Performed **product quality inspection and verification** using **OMM and VMM machines** to ensure dimensional accuracy and compliance with technical specifications.
- Conducted **precision measurements and visual inspections** to identify defects, deviations, and non-conformities in manufactured components.
- Prepared and maintained **detailed inspection and quality reports**, documenting measurement results, observations, and corrective actions.

PROJECTS (Major Only)

Hotel Assistant

- A software application designed to manage hotel operations efficiently, including room booking, guest check-in/check-out, billing, and reservation management. The system helps streamline daily hotel activities, improve customer service, and reduce manual work through centralized data management.

Smart Society

- A software application developed to manage residential society operations such as member details, maintenance records, payments, notices, and complaints, enabling smooth communication and efficient administration.

EDUCATION

Nagpur University

B.Tech - Mechanical Engineering

July 2021 – May 2024

Nagpur, Maharashtra
